Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Tuesday 19 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Persistent heavy rain. Torrential over high ground, flooding risk.

Today:
A wet day ahead, with persistent heavy rain across the region, particularly in southeastern areas and over hills where, combined with snow melt, it is likely to cause flooding in places. Potentially torrential conditions over high ground, strong winds throughout. Maximum temperature 10 deg C (50 deg F).

Tonight:
This evening, the blustery, heavy rain is to continue and persist through the night, but southern areas could see breaks in the outbursts overnight. Higher ground remains prone to flooding. Minimum temperature 7 deg C (45 deg F).

Wednesday:
Another wet day ahead, with persistent rain through to the evening, heaviest in southern parts, with winds weakening through the day. Continued flooding risk. Showers overnight, some heavy. Maximum temperature 10 deg C (50 deg F).

Outlook for Thursday to Saturday:
Thursday and Friday will see scattered showers, some heavy, and some clear spells, as cold conditions continue. A largely dry start on Saturday, with rain later in the day.
